

Catapult Galileo Endpoints v4

Updated status mappings for agent call lifecycle and negotiation outcomes. This revision separates in-call lifecycle states from post-call results.

AGENT STATUS

INITIALIZING

UI Label: Queued

Description: Worker created before the call is placed.

RINGING

UI Label: Ringing

Description: Twilio call placed and waiting for answer.

ACTIVE

UI Label: Negotiating

Description: Call connected and the negotiation pipeline is running.

WRAPPING_UP

UI Label: Finalizing

Description: Defined status for end-of-call wrap-up. Not currently triggered.

COMPLETED

UI Label: Completed

Description: Post-call analysis finished and the session closed normally.

FAILED

UI Label: Failed

Description: Twilio call failed or the session hit an unrecoverable error.

NEGOTIATION OUTCOMES

RATE_CONFIRMED

UI Label: Deal Closed

Description: Negotiation succeeded and the rate was confirmed.

CALLBACK_REQUESTED

UI Label: Callback requested

Description: Supplier asked Galileo to call back later.

NO_AVAILABILITY

UI Label: No Availability

Description: No rooms were available for the requested dates.

ESCALATED_TO_HUMAN

UI Label: Moved to higher up

Description: Call was transferred or escalated to a revenue manager or similar owner.

FAILED

UI Label: Failure

Description: Generic negotiation failure after the call completed.

TIMED_OUT

UI Label: Timed Out

Description: Negotiation hit the maximum call duration.
